

Download the Helper Tool Zip file

1. Click on the link associated with the Helper tool.
2. In the Download Dialog box, select the Save option.
3. Make a note of the directory where you save the downloaded file.
4. When the download is complete, double-click on the file you downloaded (helper_tools.exe).
5. Unzip to the directory: \PPT VISION\Impact\Inspection Builder\Root\Vision Program Templates

Install the Helper Tools

1. Start IMPACT VPM and connect to the desired device.
2. Click on the Utilities tab, then click on the File Manager tab.
3. In the directory tree on the left side of the File Manager, open the directory where you unzipped the downloaded file.
4. Select the Helper vision program files in the file list and click the Copy button.
5. In the directory tree on the left side of the File Manager, open the directory named “IMPACT Root (/)” and select the directory named “VisionPrograms” under it.
6. Click the Paste button to put the files into the directory.
7. For the Helper tool you want to use, select the checkboxes in the columns named Load/Unload and Load On Startup.
8. Close and Restart VPM. The Helper tools you selected in step 7 will be listed in the Task list in VPM. You can call the Helper tasks from other tasks. Refer to the IMPACT Reference Guide.
